THE POWER OF FACE-TO-FACE ADVOCACY

BY ETHAN HOHENADEL

It's not just what you say, but how you say it. Delivering a message in person, rather than by phone or email, can have a profound

impact on how the message is received. One way the Iowa Association of Electric Cooperatives (IAEC) achieves this goal is by coordinating legislative fly-ins to Washington, D.C., twice a year.

Each spring and fall, a group of directors and senior staff from Iowa's electric cooperatives journey to our nation's capital to meet with Iowa's congressional delegation and their staff. These face-to-face meetings provide us with valuable opportunities to discuss priorities and issues facing the rural Iowa members and communities we serve.

Fly-in facilitates important conversations

During our recent September fly-in, our group of 20 Iowa co-op advocates met with all six members of Iowa's congressional delegation. We voiced our concerns about recent cuts to the U.S. Department of Agriculture's (USDA) Rural Economic Development Loan & Grant (REDLG) program and how vital these funds are to retaining and creating jobs in rural Iowa.

Iowa's electric co-ops lead the nation in utilizing the REDLG program to spur economic development in the small towns and rural areas we serve. We encouraged our senators and representatives to support efforts to restore REDLG funding in 2025 with intentions to maintain optimal funding levels in 2026.

We also asked our elected officials to support reasonable permitting reform to allow utilities to build sorely needed electric transmission

capacity more quickly. Finally, we shared our objections to the Environmental Protection Agency's (EPA) new power plant rules, which threaten the reliability and affordability of electricity for the Iowans we serve. We join America's electric cooperatives in opposing the EPA's power plant rules on the grounds that they are unlawful, unrealistic and unachievable.

In-person meetings make a powerful impact

Investing time and resources to meet with our elected officials in person makes a powerful impact. They appreciate face time with constituents, and we value the opportunity to talk with them and their staff in-depth about energy and economic issues. As the trade association for Iowa's electric cooperatives, IAEC is actively involved in educating our state and federal legislators on energy issues.

How you can join our grassroots efforts

We also engage with our legislators and policymakers on the grassroots level through our Iowa Rural Power advocacy efforts. As a member-consumer of an Iowa electric cooperative, we invite you to join this group and receive updates on rural Iowa energy and economic issues that may impact your community. Learn more at www.IARuralPower.org or search for "Iowa Rural Power" on social media.

Iowa's locally owned and governed electric cooperatives are committed to our mission of powering lives and communities. Maintaining positive relationships with our elected officials and policymakers is just one way we work hard to ensure safe, reliable, affordable and sustainable electricity.

Ethan Hohenadel is the director of policy and advocacy for the Iowa Association of Electric Cooperatives.

EDITOR'S CHOICE CONTEST

WIN AN iROBOT ROOMBA VAC!

Your chore list just got shorter. The Roomba Vac Essential robot is a vacuum loaded with cleaning essentials and powered by iRobot OS. Its cleaning system has three levels of powerful suction for a custom clean on carpets and hard floors.

Visit our website and win!

Enter this month's contest by visiting www.ieclmagazine.com no later than Nov. 30. You must be a member of one of Iowa's electric cooperatives to win.

There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified.

The winner of the Toro Leaf Blower from the September issue was **Norman Harrison**, a **Consumers Energy** member-consumer.

ENTER ONLINE BY NOV. 30!

CVEC LINE CREWS ASSIST IN HURRICANE HELENE POWER RESTORATION EFFORTS

BY TROY AMOSS

In the wake of Hurricane Helene's devastation, Chariton Valley Electric Cooperative (CVEC) proudly answered the call for assistance.

On Sept. 30, we sent a team of four linemen to South Carolina to support Mid-Carolina Electric Cooperative (MCEC) as they worked to restore power in the aftermath of the storm. The hurricane left widespread damage, knocking out power to thousands of residents and causing extensive damage to their infrastructure.

Hurricanes of this magnitude create significant challenges, and our hearts go out to all those affected. Here at CVEC, we are proud to be part of a cooperative network that rallies together during times of crisis. Our team, without hesitation, was ready to lend a hand and contribute to restoring power as quickly and safely as possible.

The strong winds, heavy rainfall and flooding brought by Hurricane Helene made power restoration

efforts particularly difficult. Still, our linemen worked tirelessly alongside MCEC crews to repair damaged lines and bring power back to the affected homes and businesses.

Mutual aid is one of the many benefits of the cooperative model. As electric cooperatives, we live by the principle of "Cooperation Among Cooperatives." When disaster strikes, cooperatives from across the country come together, providing crews, equipment and expertise to expedite recovery. This spirit of unity and collaboration helps

restore power faster and reminds us of the community-centered values we share.

Our CVEC crew returned home after successfully assisting in the restoration efforts, and we could not be prouder of their dedication and hard work. We thank the linemen who volunteered to be part of this effort – they've demonstrated the best of what it means to be a cooperative.

Troy Amoss is the CEO/general manager of Chariton Valley Electric Cooperative.

ADVOCACY IN ACTION: CVEC DISCUSSES PRIORITIES WITH LEGISLATORS IN D.C.

As part of our cooperative’s ongoing commitment to advocacy, Chariton Valley Electric Cooperative (CVEC) regularly coordinates meetings with state and federal legislators through the Iowa Association of Electric Cooperatives (IAEC). During the week of Sept. 23, nearly 20 electric cooperative representatives, including CVEC Board President Kenny Vandenberg and Director Richard Welsh, traveled to Washington, D.C., to meet directly with federal legislators.

“Going to our nation’s capital is an invaluable opportunity for our Iowa Rural Power grassroots efforts to make a difference. Iowa’s electric cooperatives care deeply about our members and the communities we serve, and it’s crucial to meet with our elected officials to address issues that impact our ability to provide reliable and affordable power,” Vandenberg says.

CVEC’s representatives met with every member of Iowa’s congressional delegation, including Sen. Ernst, Rep. Feenstra, Sen. Grassley, Rep. Hinson, Rep. Miller-Meeks and Rep. Nunn.

A key topic of discussion was the recent cuts to the U.S. Department of Agriculture’s (USDA) Rural Economic Development Loan & Grant (REDLG) program. This program provides essential grant funds to local utility organizations, such as electric

cooperatives, to establish revolving loan funds. These funds support local businesses and projects that create or retain rural jobs. Iowa co-op advocates encouraged the delegation to support the House version of the REDLG markups, which would partially restore REDLG funding for FY25, with intentions and a plan to return to full funding levels by FY26.

Another major focus of the meetings was addressing concerns over the Environmental Protection Agency’s (EPA) recent mandates on power plants, which pose continued threats to the reliability and affordability of electricity. America’s electric cooperatives oppose these regulations, arguing that the EPA’s rules are unlawful, unrealistic and unachievable.

In addition to meetings with legislators, IAEC organized briefings from the National Council of Farmer Cooperatives, the USDA and CoBank. These briefings provided updates on emerging trends and key issues affecting Iowa co-op members.

We are grateful for the hard work and dedication of Iowa’s elected officials and their staff, who continue to advocate for Iowans in Washington. The next trip for Iowa Rural Power advocates is planned for spring 2025. To learn more about Iowa Rural Power grassroots advocacy, visit IARuralPower.org.

GIVE TO RECare

Chariton Valley Electric Cooperative (CVEC) established RECare, a program that facilitates members helping other members. RECare provides funds to local community action agencies who then distribute assistance to low-income CVEC members. Your support helps pay winter heating bills and assists in home weatherization.

As a member of CVEC, you can make a one-time contribution or a monthly pledge to help your neighbors in need. If you choose to make a monthly pledge, it will be automatically added to your electric bill.

If you are interested in donating, please complete and return this form to our office. Any amount you give is greatly appreciated! Please note, your contributions are also tax deductible.

Please complete this form if you wish to participate in RECare. Simply detach the completed form and send directly to CVEC at P.O. Box 486 Albia, IA 52531, or include it with your next payment.

YES I care and want to contribute

- I will make a one-time contribution to RECare. My check is enclosed.
- I will contribute \$_____ per month to RECare. I understand this amount will be automatically added to my monthly electric bill. You may discontinue your pledge at any time by simply contacting our office at 641-932-7126 or P.O. Box 486 Albia, IA 52531.

ANSWERING THE CALL

IOWA'S ELECTRIC COOPERATIVES SUPPORT HURRICANE HELENE RESTORATION EFFORTS

BY ANN FOSTER THELEN

Photo Source: Chariton Valley Electric Cooperative

In the wake of Hurricane Helene, which devastated parts of the southeastern U.S., Iowa's electric cooperatives answered the call for assistance, demonstrating the true spirit of the co-op principle of Cooperation Among Cooperatives. This massive Category 4 storm left an estimated 1.25 million electric cooperative members without power, with the Carolinas suffering the most severe damage. Hurricane Helene has been the deadliest hurricane in the Atlantic so far this year, killing at least 228 people. Amid the destruction, Iowa's electric cooperatives quickly mobilized to support their fellow cooperatives in South Carolina, bringing manpower and essential equipment to help restore power in the hardest-hit areas.

Iowa's mutual aid response

Hurricane Helene was one of the most destructive storms ever to hit the co-op community, particularly in South Carolina, where more than 425,000 cooperative members lost power. Responding to an urgent

request for help, the Iowa Association of Electric Cooperatives (IAEC) coordinated the deployment of 10 crews made up of 40 linemen, 10 bucket trucks and 10 digger trucks from 11 Iowa co-ops. These crews were crucial to the restoration efforts in the Palmetto State.

On Sept. 29, as power outages spread across South Carolina, the Electric Cooperatives of South Carolina reached out to Scott Meinecke, IAEC's director of safety and loss control, for help. Six Iowa electric cooperatives – **Chariton Valley Electric Cooperative, Eastern Iowa Light & Power Cooperative, Farmers Electric Cooperative (Greenfield), Linn County Rural Electric Cooperative, Maquoketa Valley Electric Cooperative** and **T.I.P. Rural Electric Cooperative** – responded immediately by sending five full crews to assist Mid-Carolina Electric Cooperative.

"In Southern storm terms, a crew is four to five men, one digger

with pole trailer and one bucket truck," Meinecke explains.

The next day, with the scope of the damage becoming clearer, South Carolina issued a second request for more assistance. In response, four more Iowa co-ops – **Clarke Electric Cooperative, Consumers Energy, Midland Power Cooperative** and **Western Iowa Power Cooperative** – deployed an additional 16 linemen, four bucket trucks, four diggers and four pole trailers to assist Blue Ridge Electric Cooperative.

Meeting unprecedented challenges

The damage caused by Hurricane Helene was described as one of the most catastrophic in South Carolina's history. The storm snapped more than 5,000 power poles, downed thousands of power lines, and left many areas inaccessible due to fallen trees and flooding. In the hardest-hit regions, particularly those served by Little River Electric Cooperative, 99% of members

lost power. Restoring service in these areas posed significant challenges, with some regions facing weeks of outages.

Despite these challenges, Iowa's electric cooperatives continued to send help. **Nishnabotna Valley Rural Electric Cooperative** and **Midland Power Cooperative** dispatched crews to assist Little River Electric Cooperative in restoring power to the approximately 10,000 meters still without service.

The cooperative spirit in action

The work Iowa's electric cooperatives undertook in South Carolina is part of a broader, nationwide effort to assist regions hit by natural disasters. The response to Hurricane Helene was no different. Crews from 23 states were involved in the restoration effort in South Carolina alone, with more than 3,200 lineworkers working around the clock.

MiEnergy Cooperative, an electric co-op serving members in Iowa and Minnesota, also sent a team of linemen and a bucket truck through the Minnesota Rural Electric Association, extending Iowa's reach beyond direct coordination with South Carolina.

This vast mobilization of resources was instrumental in restoring power to over 363,000 consumers in South Carolina, with only 7% of the cooperative members still without power by the end of the first week of recovery efforts.

The restoration work included clearing debris, replacing snapped poles and repairing broken lines – often

Photo Source: Maquoketa Valley Electric Cooperative

Photo Source: Midland Power Cooperative

Photo Source: Western Iowa Power Cooperative

dangerous and grueling work. Crews operated in flooded areas, navigated around downed trees and worked long hours in harsh conditions.

Support and gratitude

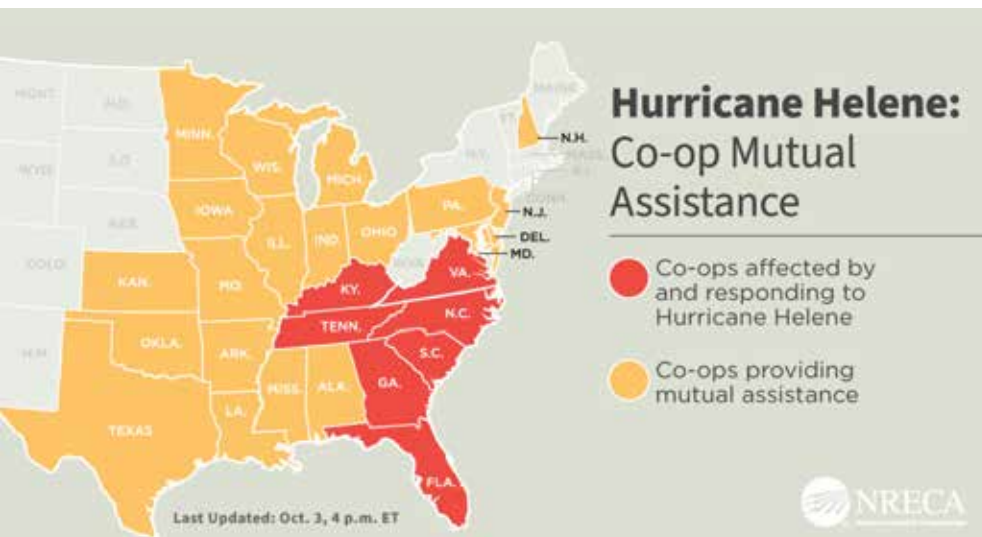

These efforts were not unnoticed. South Carolina's co-op leaders expressed deep gratitude for the help they received from Iowa and

other states. Mike Couick, CEO of the Electric Cooperatives of South Carolina, acknowledged the hard work and dedication of the lineworkers, stating, "Our folks are doing everything they can to help by restoring power as quickly as possible to the communities that remain out. Our work won't stop until the very last light is back on."

Back in Iowa, IAEC and its member co-ops kept their communities informed through updates on social media and encouraged their followers to keep the linemen in their thoughts and prayers as they worked to restore power to South Carolina's residents.

Iowa's linemen, alongside thousands of others from across the country, have shown that when disaster strikes, the cooperative network stands ready to help – no matter how far they have to go to lend a hand.

Ann Foster Thelen is the editor of Iowa Electric Cooperative Living magazine.

APPLES & YAMS

- 2 large yams
- 2 apples
- ¼ cup brown sugar
- 1 teaspoon corn starch
- ⅛ teaspoon ground cloves
- ½ cup orange juice
- 3 tablespoons pecans or walnuts, chopped water

Fill a large saucepan with water and boil unpeeled yams for 30 minutes, until tender but firm. Cool yams enough to handle, then peel and slice crosswise, ¼-inch thick. Core and slice apples ¼-inch thick. In a shallow 1-quart baking dish, overlap the apple and yam slices. In saucepan, combine brown sugar, corn starch and cloves. Add orange juice and blend. Cook over low heat, stirring until sugar dissolves and sauce thickens. Pour sauce over apples and yams. Sprinkle with nuts and bake at 375 degrees F for 20 minutes.

Karen Caldwell • Albia
Chariton Valley Electric Cooperative, Inc.

CORNBREAD BAKE

- 1 stick butter, melted
- 1 can cream style corn
- 1 can whole corn, undrained
- 8 ounces sour cream
- 2 eggs, beaten
- 1 small box cornbread mix

Mix all ingredients in a large bowl. Pour mixture into a lightly greased 9x9-inch pan or baking dish. Bake uncovered at 350 degrees F for 55-60 minutes. Serve warm. Serves 8

Kristine Frakes • Melrose
Chariton Valley Electric Cooperative, Inc.

SCALLOPED CHICKEN DISH

- 4 eggs, beaten
- 1 can cream of mushroom soup
- 13 ounces evaporated milk
- 1 quart chicken broth
- 1 tablespoon butter
- 1 chicken, cooked and boned
- 2 cups celery, diced
- 1 onion, diced
- 4 cups croutons
- 2 teaspoons sage salt, to taste pepper, to taste

Mix eggs, soup, milk, broth and butter. Add chicken, celery, onions, croutons and seasonings. Bake covered at 375 degrees F for 1½ hours. Serves 15

Jana Overholtzer • Russell
Chariton Valley Electric Cooperative, Inc.

CREAM CHEESE MASHED POTATOES

- 5 pounds potatoes
- 1-2 cups sour cream
- 6-8 ounces cream cheese
- 2 teaspoons onion salt
- 1 teaspoon salt
- ¼ teaspoon pepper
- 2 tablespoons butter shredded cheese, optional

Peel, cube and cook potatoes. Mash potatoes and add remaining ingredients, mix well. If potatoes are too stiff, add a little milk. Shredded cheese can be mixed in or put on top. Freezes well. Serves 8

Ranita Gehman • North English
T.I.P. Rural Electric Cooperative

SWEET POTATO CASSEROLE WITH PRALINES

- 6 cups sweet potatoes
- 1½ cups sugar
- 3 teaspoons vanilla, divided
- 2 sticks butter, softened, divided
- 2 eggs
- 1¾ cups brown sugar
- 2 cups pecans, chopped
- 1 cup flour

Cook, drain and mash sweet potatoes. Mix with sugar, 1 teaspoon vanilla, 1 stick butter and eggs. Spread in greased 9x13-inch pan. Mix brown sugar, 2 teaspoons vanilla, pecans, 1 stick butter and flour. Sprinkle on top of casserole. Cover with foil and bake at 350 degrees F for 20 minutes. Uncover and bake an additional 15-25 minutes, until heated through and topping is browned. *Serves 12-24*

**Amber Wetzel • Linden
Guthrie County Rural Electric Cooperative Association**

SWEET POTATO CRANBERRY CASSEROLE

- ½ cup flour
- ½ cup oatmeal
- ½ cup brown sugar
- 1 teaspoon cinnamon
- ½ cup butter, softened
- 2 17-ounce cans yams, drained
or 4 cups sweet potatoes, peeled, cut and cooked
- 2 cups fresh cranberries
mini marshmallows, optional

Combine flour, oatmeal, brown sugar and cinnamon. Cut in butter (can substitute margarine). In a large bowl, combine yams (or sweet potatoes) with 1 cup of the crumb mixture and cranberries. Place in 2-quart casserole dish. Top with remaining crumb mixture. Bake covered at 350 degrees F for 35 minutes. If desired, uncover and top with marshmallows and cook an additional 5 minutes or until marshmallows are browned.

**Laurie Thompson • Parnell
T.I.P. Rural Electric Cooperative**

BEANS ROYALE

- 1 21-ounce can pork and beans
- 2 tablespoons brown sugar
- ¼ teaspoon dry mustard
- ¼ teaspoon chili powder
- ⅛ teaspoon garlic powder
- ½ teaspoon minced onion
- 1 tablespoon vinegar
- 1 14.5-ounce can chopped tomatoes

Combine all ingredients in a 2-quart casserole dish. Bake at 350 degrees F for 20 minutes. For more tang, substitute dry mustard with liquid mustard. *Serves 6-8*

**Joanne Fox • Sioux City
North West Rural Electric Cooperative**

SCALLOPED POTATOES WITH MUSHROOMS

- 1 can coconut milk
- 1 can water (using coconut milk can)
- 1 cup raw cashews
- 1 teaspoon onion powder
- 1 teaspoon garlic powder
- 1 tablespoon Maggi seasoning sauce
- ½ cup nutritional yeast
- 6 potatoes, peeled, thinly sliced
- 1 can mushrooms, chopped small
- 1 medium sweet onion, thinly sliced
- 1 tablespoon parsley flakes

In a blender, add the first seven ingredients and blend until smooth, creating a sauce. Pour ⅓ of the sauce in bottom of a 9x11-inch pan. Layer half the potatoes, mushrooms and onions in pan. Cover with ⅓ of the sauce. Layer remaining potatoes, mushrooms and onions. Cover with remaining ⅓ of the sauce. Sprinkle parsley flakes on top. Bake covered at 350 degrees F for 1 hour, until potatoes are tender. The thinner the slices, the quicker they will cook. Uncover and bake for an additional 15 minutes or until the top is light golden brown. *Serves 6*

BEST SMART HOME TECH ON A BUDGET

BY MIRANDA BOUTELLE

With all the buzz around smart technology, you may be asking yourself how to get the most bang for your buck. Smart technology can make it easier to save energy by simplifying or automating tasks. It can also optimize energy use to reduce waste and improve efficiency.

When upgrading to smart technology at home, consider the purchase cost and long-term savings. For example, you may pay a little more for a product with the latest technology, but it could result in significant savings each year and over the lifetime of the appliance.

Consider these smart devices that will take the work out of saving energy.

Smart thermostats

Smart thermostats save energy by automatically adjusting

your heating or cooling system. For example, you can save as much as 10% a year on heating and cooling costs by adjusting your thermostat 7 to 10 degrees from its normal setting for eight

hours a day, according to the U.S. Department of Energy (DOE).

You can program a smart thermostat to change the temperature while asleep or away or use a smartphone app to adjust the settings. Some models use artificial intelligence to maximize efficiency by learning your patterns and preferences. Prices range from \$80 to \$250, depending on features. Smart thermostats do not work with all heating and cooling systems, so check compatibility before you buy.

Water heaters

Your water heater can also be controlled for energy savings. According to the DOE, installing a timer on your electric water heater can

save 5% to 12% of the energy it uses by turning it off at night and when you don't need to use hot water.

If you are already planning to replace your electric storage water heater with a heat pump water heater, consider a model equipped with smart technology features, including Wi-Fi capabilities for controlling it remotely or during peak demand times, viewing the amount of hot water available and tracking energy use. There are a variety of modes, including vacation, efficiency, and high demand, which produces more hot water. Some models can notify you or shut off if a leak is detected. Depending on the manufacturer and size of the unit, a smart heat pump water heater may only cost a few hundred dollars more than a standard heat pump water heater.

Smart lights, switches and plugs

Smart lighting gives you the power to remotely control lights in your home or set a lighting schedule

that fits your lifestyle. This can be beneficial for energy savings and provide home security benefits. If you or other household members are notorious for leaving lights on, smart lighting can help. Numerous features are available, including dimmable bulbs and color-changing effects.

Smart light switches are another budget-friendly way to control lighting. They're priced from about \$10 to \$50. Smart switches with dimmable options are available and can also control ceiling fans. Some have occupancy sensors that turn lights off when no movement is detected in a room.

A smart plug fits into any outlet to control whatever is plugged into it. Set it to automatically turn off and

on or control it using a smartphone app. Prices range from \$8 to \$25.

Smart controls

A wide variety of smart shades, curtains and blinds are available, including styles with integrated controls. You can also

add smart controls to your existing blinds or curtains. Both options allow you to adjust the tilt of blinds and open or close curtains. Set a schedule, control them remotely or use a voice command paired with a voice

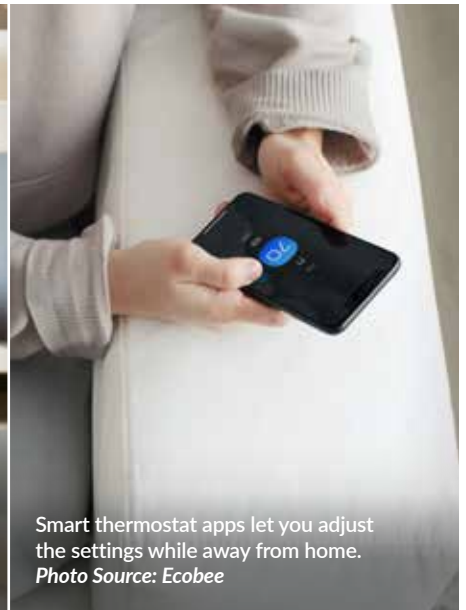

assistant, such as Alexa or Google Home. This allows you to reduce cooling needs in the summer and heating needs in the winter. Smart controls start at around \$70. To save the most energy, prioritize windows with the most incoming light.

Upgrading to smart home technologies can make using less energy at home easy. Choose options that make the most sense for your lifestyle to optimize savings.

Miranda Boutelle writes on energy efficiency topics for the National Rural Electric Cooperative Association.

If you're looking to take the plunge and integrate multiple smart bulbs to your home lighting system, your best bet may be a kit, like the Philips Hue Starter Kit. *Photo Source: Philips*

Smart thermostat apps let you adjust the settings while away from home. *Photo Source: Ecobee*

Smart heat pump water heaters have automation features that help you use less energy. *Photo Source: Northwest Energy Efficiency Alliance*

CVEC'S ANNUAL "FILL THE BUCKET" FOOD DRIVE

For the 15th year in a row, Chariton Valley Electric Cooperative (CVEC) is holding a food drive to benefit those in our community who are less fortunate – and after the tremendous success of last year's event, we're excited to bring back our "fill the bucket" food drive!

Last year, our community truly came together, filling buckets to the brim and making a huge impact on local food pantries. This year, we're aiming even higher! On Nov. 16, from 9 a.m. to 1 p.m., CVEC employees and directors will once again be stationed in the Hy-Vee

parking lot and Jim & Charlie's parking lot in Albia, ready to collect your nonperishable food donations.

Our local food pantries rely on the donations they receive to help keep their shelves stocked, and your donations make a real difference in helping families and individuals struggling with hunger. Whether you can stop by on the day of the event or drop off items early at the CVEC office (open 8 a.m. to 4:30 p.m. on weekdays), every contribution counts!

Let's join forces once again to fight hunger in our communities and ensure no one goes without food this holiday season.

OFFICE CLOSING

Happy Thanksgiving from all of us at Chariton Valley Electric Cooperative! Our office will be closed on **Thursday, Nov. 28, and Friday, Nov. 29.** We will be back in the office and ready to serve you on Monday, Dec. 2; however, our phones are always answered 24/7. Wishing all our members a wonderful Thanksgiving filled with gratitude and joy!

PROTECTING YOUR POWER FROM NATURE'S IMPACT

The recent hurricanes in the southeastern part of the U.S. are a powerful reminder of how storms can severely impact electric distribution systems. Although we're nestled in the heart of the Midwest, far from hurricanes, we still face our own severe weather – like strong winds and ice storms – that can disrupt power.

While we can't prevent natural disasters, we can reduce risks through proactive measures. One key initiative is our vegetation management program, which includes regular tree trimming. As winter approaches, often bringing heavy snow and ice, managing vegetation around power lines becomes even more critical.

Strong winds and storms can cause trees and branches to come into contact with power lines, which may result in brief service interruptions, known as "blinks." These momentary disruptions are a safeguard for the system and help prevent more significant outages.

Though Mother Nature ultimately has the final say, we're committed to minimizing her impact. Through careful planning and maintenance, we work hard to keep your power reliable, even in the harshest weather.

SEVEN COOPERATIVE PRINCIPLES CROSSWORD PUZZLE

Did you know electric co-ops are guided by a set of seven cooperative principles? These principles ensure co-ops like ours remain focused on member needs, community impact and co-op values.

Complete the crossword below to learn more about the cooperative principles. Use the word bank to check your work.

ACROSS

- 2. Cooperation Among Cooperatives: Co-ops _____ and learn from other co-ops.
- 5. Autonomy & Independence: Co-ops are _____ and can operate on their own.
- 6. Member Economic Participation: Members _____ money to ensure the co-op runs smoothly.
- 7. Open & Voluntary Membership: Co-op membership is open to _____.

DOWN

- 1. Concern for Community: Co-ops give back to their local _____ to help them thrive and grow.
- 3. Education, Training & Information: Co-ops focus on _____ to ensure employees and members have the info they need.
- 4. Democratic Member Control: Members get to make _____ about the co-op.

ANSWER KEY

2 ACROSS: SHARE 6 ACROSS: CONTRIBUTE 3 DOWN: EDUCATION 4 DOWN: DECISIONS
 5 ACROSS: INDEPENDENT 7 ACROSS: EVERYONE 1 DOWN: COMMUNITIES

CONFERENCE PROVIDES ENERGY EFFICIENCY RESOURCES TO TRADE PROS

In today's world, sustainability and energy efficiency have become paramount in the construction industry. Iowa's electric cooperatives invite building trades professionals to the **2025 Momentum is Building (MIB) conference**, scheduled for Feb. 20-21, 2025, at the Sheraton West Des Moines. The annual conference aims to equip contractors and their staff with the knowledge and tools necessary to excel in a rapidly changing construction landscape.

According to the 2023 National Association of REALTORS® Sustainability Report, 63% of real estate professionals recognize the value of promoting energy efficiency in property listings. Homebuyers increasingly prioritize features that reduce carbon footprints and lead to long-term utility savings.

Iowa's electric cooperatives serve as a source of information and provide expertise to help members save energy and lower their electric bills. Educating Iowa home builders and contractors about the latest energy-efficiency innovations is another way electric co-ops assist members in reaching their energy goals. For more than 30 years, the annual conference, sponsored and organized by the Iowa Cooperatives for Energy Efficiency, has connected Iowa's construction industry with the local services and resources available from Iowa-based electric cooperatives, which serve nearly 650,000 Iowans across 99 counties.

MIB serves as a resource to provide the information area contractors need to design and improve homes that are energy-efficient, healthy, comfortable and affordable.

For more information about the conference or to register, visit www.momentumisbuilding.com or contact your local electric cooperative.

Sheraton West Des Moines

MIB ALLOWS ATTENDEES TO:

- **Stay ahead of the curve.** Get the latest insights on industry trends, green building best practices and innovative construction technologies. Earn valuable Continuing Education Units (CEUs) for electricians, plumbers and HVAC professionals.
- **Gain insights.** MIB keynote speaker Bill McAnally, a long-time friend and energy-efficiency expert in Iowa, will look back at energy-efficient homebuilding and the lessons learned.
- **Learn about sustainability.** Discover energy-efficient products and practices and chat with the experts who market and sell products and services that can save money, attract more clients and contribute to a greener future.
- **Network.** Connect with fellow contractors, builders, energy-efficient product specialists and industry experts. Share experiences and foster valuable partnerships.

LEADERS' VISION HONORS VETERANS

BY DARCY DOUGHERTY MAULSBY

I always enjoy hearing from *Iowa Electric Cooperative Living* readers. One reader, Carolyn, asked if I could share more information about the history of the renovated Community Memorial Building in my hometown of Lake City.

The idea for this exceptional building took root in the wake of World War I. The Community Memorial Building was built in 1919-1920 to honor local military members and provide a multipurpose facility for the community's use.

The philosophy of project supporters was: "That the dead not be forgotten, and that the living be honored, was the purpose of this memorial. Not cold, gray marble shafts, but a place where all may meet and enjoy the blessings saved for us by the boys in blue and khaki."

Local women spearheaded this ambitious project. The Lake City Civic Improvement Society led the campaign to build the \$85,000 structure. That equates to more than \$1.5 million in 2024 dollars!

I chuckle whenever I read this comment from a 1921 edition of the *Dearborn (Michigan) Independent* newspaper, which ran a feature story on Lake City's Community Memorial Building. "The Lake City Civic Improvement Society is the peppiest organization in town.

There are nearly 250 members of this society from the town and surrounding country. The strange part of it is, they are all women."

Hiring the best of the best

The Community Memorial Building was no ordinary place. Des Moines-based Proudfoot, Bird & Rawson, Iowa's foremost architectural firm at the time, designed the two-story, brick structure. This firm also designed the Memorial Union at Iowa State University (ISU), and courthouses in Polk County and Greene County.

Neumann Brothers Inc., which is still in business today, built the Community Memorial Building. Neumann Brothers also built the Equitable Building in Des Moines (the first skyscraper in Iowa), the Cowles Library at Drake University, and ISU's Memorial Union, which honors students and alumni who died during World War I.

Lake City's Community Memorial Building opened to the public on Armistice Day in November 1920. The gala celebration included speeches, building tours, a three-act musical comedy called "Miss Bob White," and a football game between the Lake City and Rockwell City American Legions.

Through the years, local veterans' groups have met at the Community Memorial Building. Countless events have also been hosted in this iconic building.

Major renovations transformed the Community Memorial Building in 2020-21.

Vision: the difference between success, failure

About five years ago, a group of community leaders led a fundraising campaign to support an extensive renovation of the Community Memorial Building, which is listed on the National Register of Historic Places. I was fortunate to attend the November 2021 re-dedication of this architectural gem and community center as it continues to honor members of the military and veterans.

Today, you can rent this elegant venue for wedding receptions, meetings and other events. Each time I step inside, I'm reminded of the wisdom of Sir Winston Churchill, who noted, "We shape our buildings; thereafter, they shape us."

Those women who proposed the idea for the Community Memorial Building so long ago knew this. So did the writer of "Community Building: A Great Necessity," which appeared in the May 1, 1919, edition of the *Lake City Graphic*: "The difference between success and failure is often a difference in vision. To accomplish any material thing, an insight into the future is essential. People must have a vision to gain inspiration. Communities grow in proportion to their vision."

Darcy Dougherty Maulsby lives near her family's Century Farm northwest of Lake City. Visit her at www.darcymaulsby.com.

Lake City's Community Memorial Building opened to the public on Armistice Day in November 1920.

For more than a century, the Community Memorial Building has been a centerpiece of the community.
