# ELECTRIC COOPERATIVES CHAMPION UTILITY WORKER SAFETY

BY JAY CEPERLEY

As we enter the month of March, Iowa's electric cooperatives are proud to recognize and celebrate the essential work of utility workers across our state.

Iowa Utility Worker Appreciation Day, observed each year on March 8, offers an important opportunity to honor the dedication, professionalism and service of the men and women who keep our communities connected, safe and reliably powered. These workers respond at all hours, often in hazardous conditions, to restore electricity and maintain the systems that power modern life. Their commitment ensures that Iowa families, farms and businesses receive dependable service every day.

## A longstanding commitment to safety

Iowa's electric cooperatives have always maintained a strong and unwavering commitment to safety. This priority is deeply rooted in our mission of powering lives and informs how we serve our members, support our employees and protect the communities we operate in. We have consistently championed initiatives that improve the safety of Iowans, including hands-free driving legislation designed to reduce distracted driving, as well as the "Move Over, Slow Down" law, which requires motorists to move over and slow down when passing work vehicles on the roadside. These efforts reflect a broader goal: ensuring that not only utility workers, but all community members, can work and travel safely throughout our state.

With the 2026 Iowa Legislative Session fully underway, Iowa's electric cooperatives are actively engaged at the Capitol to ensure that our

members' voices are heard. Safety remains one of our highest priorities, shaping not only our daily operations but also our advocacy efforts.

## Strengthening protections for utility workers

This year, our ongoing commitment to safety is reflected in new legislation proposed by Iowa's electric cooperatives that would increase penalties for individuals who threaten, harass or assault utility workers while they are performing their duties. Lineworkers are often required to enter unpredictable, high-risk environments to restore power, post for disconnection and trim vegetation. When they encounter hostile or aggressive behavior, the dangers they face increase significantly. Because Iowa law requires these workers to respond in such situations, they deserve the

strongest possible legal protections already given to other public servants like first responders, corrections officers and healthcare workers.

Regardless of the outcome of this year's legislation, Iowa's electric cooperatives will continue advocating for robust protections for utility workers. Our commitment to safety remains steadfast. These efforts reflect our longstanding mission: to champion safety, support our workforce and serve the best interests of the communities we proudly power.

*Jay Ceperley is the advocacy coordinator for the Iowa Association of Electric Cooperatives.*

March 8 is  
Iowa Utility Worker  
Appreciation Day

## EDITOR'S CHOICE CONTEST

### WIN AN EMILE HENRY PIZZA STONE AND COOKBOOK!

Finished with Emile Henry's proprietary glaze, this 16-inch pizza stone produces perfectly crispy crusts. The piece withstands exceptionally high heat, so it can be used in the oven or on the grill. Plus, chef and author Alexandra Stafford showcases pizza in her latest cookbook. Each recipe focuses on seasonal ingredients and is paired with a complementary salad.

### Visit our website and win!

Enter this month's contest by visiting [www.ieclmagazine.com](http://www.ieclmagazine.com) no later than March 31.

You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified.

The winner of the Ninja Crispi Air Fryer from the January issue was **Ray Netherton**, a **North West REC** member-consumer.

ENTER ONLINE BY MARCH 31!

# YOUR ELECTRIC RATE UPDATE: WHAT MEMBERS NEED TO KNOW FOR 2026

BY TROY AMOSS

At Chariton Valley Electric Cooperative (CVEC), we understand that electricity is essential – but so is keeping it affordable. Every

day, our members count on us for safe, dependable power, and our responsibility is to deliver that service while carefully managing costs.

### Managing costs without compromising service

Our team works

diligently to control expenses before passing on any increases along to our members. We focus on improving efficiency, exploring cost-effective options for materials and equipment, extending the life of our assets when it's safe to do so, and partnering with power suppliers to share costs and improve operational efficiency.

Even with these efforts, occasional adjustments are necessary to maintain the reliability our members expect and deserve. After careful review,

our board of directors has approved a rate adjustment that will take effect April 1, 2026. This adjustment supports the long-term reliability of the electric system that serves our members today and in the future.

### A cooperative approach

As a not-for-profit, member-owned cooperative, all revenue

is reinvested to operate, maintain and improve the electric system – not to generate profits. Looking ahead, we will review rates annually to make sure we collect only what is needed to serve you efficiently and reliably.

### Helping members save energy

We also encourage members to take simple steps to manage energy use at

home. Small changes like adjusting thermostats, sealing doors and windows, using energy-efficient lighting and appliances, and being mindful of peak usage times can help you save energy and lower your bills. Our staff is always happy to provide tips and guidance to help you make the most of your energy use.

Thank you for being a valued member-owner of CVEC. We remain committed to serving you with transparency, responsibility and care.

**For the full updated rate schedule and more information, visit our website at [www.cvrec.com](http://www.cvrec.com).**

*Troy Amoss is the CEO/general manager of Chariton Valley Electric Cooperative.*

# CVEC ANNOUNCES 2025 Q4 OPERATION ROUND UP GRANT RECIPIENTS

Chariton Valley Electric Cooperative (CVEC) is proud to announce the recipients of its 2025 Q4 Operation Round Up® grants:

- Almost Home Animal Rescue** was awarded \$4,180 to assist with an energy-efficient lighting project at their facility. This upgrade will help reduce energy costs, improve lighting for staff and volunteers, and create a safer, more welcoming environment for the animals in their care. By investing in energy-efficient technology, Almost Home Animal Rescue can allocate more of its resources directly to animal care and shelter operations.

- Carnegie Evans Public Library** was awarded \$8,000 to assist with the purchase of a new book drop box. This new drop box will replace the library's old one, which currently leaks and creates challenges for the safe return of materials. The upgraded box will provide community members with a convenient, accessible and weatherproof way to return books and other materials at any time, helping the library maintain efficient circulation and better serve patrons of all ages.

These grants are part of CVEC's ongoing commitment to supporting local organizations and community projects that have a tangible, positive impact on the lives of members and neighbors.

## Empowering our community

The Operation Round Up program embodies the cooperative spirit by turning small contributions into significant, lasting impacts. CVEC members voluntarily round up their monthly electric bills to the nearest dollar, with the extra change pooled together to fund grants for local organizations and service projects.

"Each grant we award is a reflection of our members' generosity and our shared commitment to building stronger, safer communities," said Anna See, communications coordinator/executive assistant at CVEC. "Projects like the new lighting at Almost Home Animal Rescue and the book drop at Carnegie Evans Public Library show how small donations can create big results."

Since its launch, Operation Round Up has supported a wide range of initiatives, including emergency

services, food banks, youth programs and community improvement efforts. To date, the program has awarded \$135,099.11 to 38 organizations throughout CVEC's service area. This demonstrates how collective action, no matter how small, can lead to lasting change.

## How you can get involved

CVEC encourages local nonprofits and community groups to apply for future Operation Round Up grants. Applications are reviewed quarterly, with the next deadline set for March 31.

If your organization is interested in applying for a grant or would like more information about the program, visit [www.cvec.com](http://www.cvec.com).

# A NATIONAL VIEW WITH LOCAL ROOTS

BY ANN FOSTER THELEN

**Mike Partin**  
President of the  
National Rural  
Electric Cooperative  
Association

**Leslie Kaufman**  
Executive Vice President  
and General Manager of  
the Iowa Association  
of Electric Cooperatives

In 2025, Mike Partin was elected president of the National Rural Electric Cooperative Association (NRECA). He began working for the members of Sequachee Valley Electric Cooperative in central Tennessee in 1998, has served as CEO since 2015 and has represented Tennessee on the NRECA board of directors since 2019. NRECA is the national trade association representing more than 900 local electric cooperatives across the U.S.

During the Iowa Association of Electric Cooperatives' (IAEC) annual meeting in December, Partin sat

down with Leslie Kaufman, IAEC executive vice president and general manager, to discuss important energy topics. More than 375 Iowa cooperative leaders and directors were in attendance to engage in the discussion. We are pleased to share a snapshot of the discussion with *Iowa Electric Cooperative Living* readers.

**Leslie Kaufman: Mike, you serve as both president of NRECA and CEO of your local electric cooperative. Why is it so important for cooperative leaders to be involved at the state, regional and national levels?**

**Mike Partin:** Engagement matters because this industry is changing fast. Whether you're a director or a staff member, you don't come to the table just to hear reports. You come to make a difference. If we think we're on an island as one cooperative, we're doing our members a disservice. The best ideas come from learning what other cooperatives are facing and how they're responding. Electric cooperatives serve nearly 60% of the nation's landmass, and

rural areas, including places like Iowa, are growing. To stay ahead, we have to lean into leadership, training and collaboration. That's how we remain drivers of innovation in our communities.

**Kaufman: As you travel across the country, what common challenges or trends are you hearing about from electric cooperatives?**

**Partin:** One big issue is data centers. They're moving into rural America, and that creates opportunity but also risk. We need to have reliable energy capacity to serve those loads. A key question is also how to serve that load without shifting costs onto existing members. Those agreements must be structured carefully.

Cybersecurity is another growing concern. A decade ago, we weren't talking about ransomware. Now it's a real threat. On the East Coast, some cooperatives recently went into major storms unable to access their systems and maps because of cyberattacks. That's something no cooperative can afford.

Workforce development is also a top priority. How do we recruit, train and retain good people, especially as experienced workers retire and younger employees come in with different expectations?

**Kaufman: From an advocacy standpoint, what are the top priorities for NRECA right now?**

**Partin:** Federal Emergency Management Agency (FEMA) reform is at the top of the list. The system is broken. Currently, cooperatives can wait five or six years for reimbursement after a major disaster, forcing them to borrow just to stay afloat. That's not sustainable.

We're pushing legislation that would require FEMA to act within 120 days and reimburse interest if delays continue. Of the 435 congressional districts, 433 experienced a disaster declaration in the last decade, so this issue affects everyone, including Iowa. That's why cooperative leaders are actively talking with their elected officials and helping move this forward.

**Kaufman: You stepped into the NRECA presidency during a new presidential administration. How does that affect the way NRECA operates in Washington, D.C.?**

**Partin:** One of the biggest challenges is policy whiplash. Our industry, especially generation and transmission cooperatives, makes 60- to 80-year investments, but national energy policy often swings dramatically from

one administration to the next. That uncertainty makes planning harder.

What we're seeing now is more recognition that electricity is foundational. Data centers, manufacturing and national defense all depend on reliable, baseload (24/7) power. Energy security is national security. That understanding gives us a chance to push for policies that support an all-of-the-above approach to generation and faster permitting for needed infrastructure.

**Kaufman: You've talked about some powerful moments you've experienced in leadership. Is there one that really stands out?**

**Partin:** One that still gives me goosebumps is seeing lights come on for the first time in a village in Guatemala through the electric cooperative international program. Walking up a ridge at night and seeing that village lit up reminds you of why this work through the NRECA International Program matters.

Another moment was being at the White House and seeing one of my linemen standing behind the President of the U.S. No matter your politics, that's a powerful reminder that the people who keep the lights on matter.

Scan the QR code to learn how Iowa's electric cooperatives support international electrification.

**Kaufman: Partnerships are critical in Washington. Who are some of the key allies cooperatives work with?**

**Partin:** Depending on the issue, we partner with municipal utilities, investor-owned utilities, farm organizations like Farm Bureau and homebuilders. Strategic alliances help open doors and amplify our voice. For three years running, NRECA has been named the most effective trade association in Washington, D.C., but that effectiveness comes from collaboration. Relationships matter.

**Kaufman: From a CEO perspective, what keeps you up at night?**

**Partin:** Safety, without question. We know how to build lines and restore power, but keeping employees safe is the responsibility that weighs heaviest. Am I doing enough? Am I setting the right tone? Am I leading by example?

That concern doesn't change when I put on my national hat. Whether at the local or national level, leadership means making sure people go home safe at the end of the day.

**Kaufman: With all the challenges facing the industry, what gives you hope?**

**Partin:** The people. When I attend director trainings or emerging leader programs, I see how committed electric cooperative folks are. They all "signed up" to make a difference.

This is not a stale industry. There's innovation everywhere, from technology to workforce development to global electrification. I truly believe there's never been a more exciting time to be part of America's electric cooperatives.

Electric cooperatives were founded to power possibility, and that mission continues today, from Iowa's rural communities to villages halfway around the world. As Partin reminded attendees, the cooperative model works because it puts people first and because leaders are willing to step up, engage and shape the future together.

*Ann Foster Thelen is the editor of Iowa Electric Cooperative Living magazine.*

## RASPBERRY-CHIPOTLE BARBECUE CHICKEN PIZZA

- 1 thin ready-made pizza crust
- ¼ cup red raspberry preserves or jelly
- ¼ cup hickory smoke flavored barbecue sauce
- ¼ teaspoon ground chipotle chili powder
- 6 ounces chicken, cooked and cubed
- 2-3 tablespoons onion, chopped
- 1½ cups shredded mozzarella cheese
- ¼ cup grated Parmesan cheese

Place pizza crust on a pizza pan. Mix preserves, barbecue sauce and chili powder. Spread mixture evenly over dough. Top with chicken, onion and cheese. Bake at 425 degrees F for 12-20 minutes, until cheese is melted and pizza crust edges are golden brown. Raspberry preserves can be substituted with Concord grape jelly. *Serves 4, two pieces per person*

Mary Grossman • Carroll  
Raccoon Valley Electric Cooperative

## SPINACH AND CHICKEN PESTO PIZZA

- 1 ready-to-serve, 12-14-inch pizza crust
- 2-3 tablespoons olive oil
- ¼ cup pesto
- 2 cups shredded mozzarella cheese
- 2 cups fresh baby spinach leaves, washed
- 1 cup chicken, cooked and diced
- ¼ cup roasted red bell peppers, chopped and drained
- ½ teaspoon garlic salt
- hot pepper flakes, to taste

Place pizza crust on an ungreased pizza pan and brush the edges with olive oil. Spoon pesto onto the middle and spread evenly out to the crust. Top with mozzarella, spinach, chicken, red bell peppers, garlic salt and hot pepper flakes. Bake at 425 degrees F for 10-12 minutes, or until crust is golden brown. *Yield: 6 servings*

MacKenzie Rutter • Ankeny  
Consumers Energy

## TOMATO AND FETA BAKED PASTA

- 12 ounces rigatoni pasta, cooked and drained
- 1½ cups ham, chopped
- 4 large plum tomatoes, chopped
- 1 cup feta cheese
- 2 cups mozzarella cheese
- 1½ teaspoons dried thyme
- 1 cup half and half
- salt, to taste
- pepper, to taste

Place cooked pasta in a buttered 9x13-inch dish. Mix ham, tomatoes, cheese and thyme. Spread over pasta, then pour half and half over top. Sprinkle with salt and pepper. Cover with foil and bake at 375 degrees F for 20 minutes. Stir and continue baking 40 minutes longer. *Serves 6*

Hana Hartter • Rock Rapids  
Lyon Rural Electric Cooperative

## GOAT CHEESE MUSHROOM PASTA

- 1 8-ounce box of your favorite pasta
- 2 tablespoons olive oil
- ½ red onion, diced
- 1 package baby bella mushrooms, diced
- 2 garlic cloves, finely chopped
- 4 ounces plain goat cheese, cubed
- ¼ cup heavy cream
- 1 teaspoon rosemary
- 1 teaspoon thyme

Boil noodles until al dente. While boiling, place a pan on medium heat, add olive oil and onion. Cook until translucent, then add mushrooms. As the mushrooms soften, add garlic and sauté for another 30 seconds. Place the goat cheese in the pan and add heavy cream. Add rosemary and thyme. Once goat cheese is combined with the cream to create a smooth sauce, toss drained noodles into the pan and coat. *Serves 3-4*

Monika Olmstead • Huxley  
Consumers Energy

Visit [www.ieclmagazine.com](http://www.ieclmagazine.com) and search our online archive of hundreds of recipes in various categories.

## UPSIDE DOWN PIZZA

- 1½ pounds ground beef, pork or turkey
- 1 teaspoon salt
- 1 teaspoon pepper
- optional vegetables: mushrooms, onion or green pepper (chopped)
- pepperoni
- 1 16-ounce jar spaghetti sauce
- 1 cup flour
- 2 eggs
- 1 cup milk
- 2 tablespoons vegetable oil
- 2 cups mozzarella cheese
- Parmesan cheese

Brown meat with salt, pepper and optional vegetables. When the meat is cooked, drain fat. Mix the meat with pepperoni and spaghetti sauce. Add mixture into a 9x13-inch baking dish. Mix together flour, eggs, milk and oil into a pizza dough. Sprinkle the mozzarella cheese on meat mixture in baking dish then top with dough. Finally add parmesan cheese. Bake at 350 degrees F for 1 hour. *Yield: 12 servings*

Judy Jackson • Hedrick  
Access Energy Cooperative

## SALMON PASTA

- 1 12- or 16-ounce salmon filet
- ½ teaspoon kosher salt
- ¼ teaspoon black pepper
- ¼ teaspoon smoked paprika
- ½ package Gustare Vita tagliatelle (8 ounces)
- 1 tablespoon salted butter
- 1 cup yellow onion, chopped
- 2 cloves garlic, minced
- ½ cup white wine
- ⅓ cup sundried tomato paste
- 1 12.5-ounce jar alfredo sauce
- fresh basil, optional for garnish

Line a baking sheet with parchment paper and place salmon on prepared baking sheet. Pat salmon dry with paper towel. Sprinkle with salt, pepper and paprika. Bake at 425 degrees F for 4-6 minutes per half inch thickness, until 145 degrees F and salmon flakes easily with fork. Meanwhile, cook tagliatelle according to package directions in a large pot of boiling salted water. Drain, reserving ½ cup pasta water. Return pasta to the pot and keep warm. Heat a 12-inch skillet over medium heat. Add butter and sauté onion until translucent. Add garlic and cook about 30 seconds, until fragrant. Pour in wine and simmer until reduced by half. Stir in sundried tomato paste and alfredo sauce. Cook until heated through. Add sauce to cooked pasta and toss until coated. If sauce is too thick, add reserved pasta water until desired consistency. Flake salmon into large pieces and gently stir into pasta. Garnish with fresh basil if desired. *Serves 4*

Pam Dick • Dexter  
Guthrie County Rural Electric Cooperative Association

## CHICKEN ORZO

- 2 chicken breasts
- salt
- black pepper
- paprika
- onion powder
- red pepper flakes
- 1 tablespoon butter
- 2 garlic cloves, minced
- ½ onion, chopped
- 1½ cups orzo pasta
- 1 16-ounce can chicken broth
- spinach leaves, to taste
- splash heavy cream
- ½ cup freshly grated Parmesan

Cut chicken into large serving size pieces and add seasonings to taste. Sear chicken on both sides in medium skillet, then lower heat and add butter. Cover and continue until cooked through. Remove chicken and brown garlic and onion in the drippings. Add orzo, allow to toast while stirring. Add chicken broth, spinach and heavy cream. Stir slowly on medium heat while distributing all evenly. Add chicken and cook on low until orzo is done and all flavors have permeated throughout. Serve topped with parmesan cheese. *Serves 4*

# POWER PLAYERS OF THE GRID

BY ANTHONY BUCKLEY

Transmission lines move enormous amounts of electricity efficiently across regions.  
Photo Source: NRECA

Every time you flip a switch, you're connecting to one of the most complex systems ever built, also known as the North American electric grid. Often called the largest interconnected machine in the world, this network spans the U.S., Canada and parts of Mexico. It includes thousands of generators, hundreds of thousands of miles of transmission lines and millions of miles of distribution power lines all working together to keep the lights on day and night.

But how does electricity actually get from a power plant to your home? And where do electric cooperatives fit in? Let's break it down.

The U.S. electric grid has three major components: generators, transmission and distribution. Each plays a critical role in delivering electricity where and when it is needed.

## Generators: Making the power

In the U.S., most power plants produce electricity by burning fossil fuels or by harnessing renewable resources like solar, wind and water. To ensure

that enough electricity is generated to keep the lights on at an affordable price, two main structures exist.

The first is a "vertically integrated" model, where in some regions, a single utility owns everything from power plants to power lines and delivers electricity directly to consumers.

In other areas, a second model is used. Instead of one company making and delivering power, many companies sell electricity in a competitive market. Utilities buy electricity from these generators and deliver it to consumers like you. In this model, a group called a regional transmission operator (RTO) or independent system operator (ISO) helps keep everything running smoothly. They make sure enough power is available every second of the day. This system is called a wholesale market, and it lets utilities buy extra power when they need it.

Most electric cooperatives don't own large power plants. Instead, they purchase power through long-term contracts, wholesale markets or from

their generation and transmission cooperative (G&T), a member-owned utility that serves multiple co-ops in a designated region. G&T cooperatives are owned by distribution co-ops like yours. There are 64 G&T cooperatives across the U.S., and they often own power plants and transmission lines. G&Ts also plan for the future by investing in new generation sources, building infrastructure and integrating renewables, all while staying true to the cooperative model: member-focused, not profit-driven.

Once electricity is generated, it doesn't stay at the power plant. It begins a long journey to reach homes, farms and businesses. Power must travel across regions to where it's needed most, and that's where the transmission system comes in. These high-voltage lines act like energy superhighways, moving electricity efficiently over hundreds of miles before it's stepped down for local distribution and, ultimately, for the devices you use every day.

**Transmission: The energy superhighway**

Transmission lines move enormous amounts of electricity efficiently across regions. Most distribution co-ops don't own these transmission lines, but they rely on their G&T cooperative to handle this part of the journey. G&Ts make sure power gets from the plant to your local co-op.

However, the electricity carried by transmission lines cannot be used as is because the voltage levels are too high. That's the job of the distribution network, which is the final step that brings power to your lights, appliances and devices.

**Distribution: The last mile**

The distribution network is the "last mile" segment of the electric grid and delivers generated energy

from the transmission network to consumers. The high-voltage power from transmission lines is converted to lower voltages that home appliances, electric vehicles and personal devices can use. This is where your electric cooperative comes in to keep local lines maintained and power flowing to members 24/7.

Understanding how power moves from generation to your home helps explain why reliability and affordability depend on teamwork and collaboration between your local co-op, its G&T partners and the broader grid. Together, co-ops are preparing for tomorrow's challenges, so you can count on safe, reliable power for years to come.

*Anthony Buckley writes on consumer and cooperative affairs for the National Rural Electric Cooperative Association.*

# FINAL REMINDER: CVEC SCHOLARSHIP DEADLINE IS APPROACHING

Time is running out for high school seniors planning to apply for a Chariton Valley Electric Cooperative (CVEC) scholarship. All applications must be submitted by March 31.

This year, CVEC will award \$5,500 in scholarships to students pursuing higher education, including:

- Four \$1,000 scholarships available to students in any field of study
- One \$1,500 scholarship designated for students entering an electrical lineworker program or climbing school, or majoring in electrical engineering

## Eligibility requirements:

- Graduating from an accredited high school or home-schooled program
- A parent or legal guardian who is a CVEC member
- Plans to attend an accredited college, university, vocational or technical school

Application deadline: March 31

- Submission of a 500-600-word essay describing how the applicant's education will help them contribute to their community

Scholarship recipients will be selected based on academic achievement, leadership, goals and essay quality.

For additional information or to apply, visit [www.cvrec.com/scholarship-program](http://www.cvrec.com/scholarship-program) or contact CVEC at 641-932-7126.

CVEC is proud to support local students as they invest in their future and the communities we serve.

## WINTER MORATORIUM ENDS APRIL 1

Members who qualified for energy assistance during the winter moratorium are advised that the moratorium will end on April 1.

If your account is past due, please contact our office before April 1 to arrange payment and avoid a potential service interruption.

For questions or to make arrangements, please contact CVEC at 641-932-7126.

# DRIVEN BY QUALITY: DOUBLE A TIRE & REPAIR IN ALBIA

BY ANN FOSTER THELEN

In the spring of 2024, Andrew and Ally Schnebly took a leap of faith. After building a steady side business from their farm near Russell, they moved Double A Tire & Repair into a remodeled shop in Albia. By October of that year, the doors were open and the couple has been serving the community ever since.

Double A Tire & Repair offers more than oil changes and tire work. It offers a commitment to quality workmanship and community investment rooted in southern Iowa values.

## From farm shop to Main Street

Andrew's path to owning a full-time repair shop began long before the move to Albia. He grew up working on older vehicles with friends and later attended college for diesel technology. Farm jobs and hands-on experience sharpened his skills even further.

"I've always just enjoyed working on equipment," Andrew said. "Before we knew it, it had turned into a really good side income."

What started in a two-car garage on a dead-end road evolved into something more. Encouraged by Ally, the couple moved the business to town to build a stronger customer base.

Today, Andrew handles most of the day-to-day shop work himself. Ally manages bookkeeping, invoicing and the behind-the-scenes details that keep the operation running smoothly. The couple recently purchased a home south of Albia and plan to become even more rooted in the community.

## More than a quick fix

Double A Tire & Repair provides alignments, tires, brakes, oil changes, and a wide range of automotive and semi work. While farm equipment work occasionally comes through the shop, the shop focuses on automotive and semi service.

But what truly sets the business apart is its philosophy.

Andrew and Ally Schnebly are pictured with their four sons.

"We're working toward being more of a preventative maintenance shop," Andrew said. "Ideally, it's better for customers if wear on items can be caught before they become broken parts."

Rather than waiting for a breakdown, customers receive a careful look-over each time their vehicle comes in. During an oil change, Andrew checks for other concerns and keeps customers informed about tire wear, brake life and fluid maintenance.

When it comes to repairs, Andrew emphasizes doing the job right. "We're not just what we call a pad slapper," he said of brake work. "We tear everything apart, inspect all the components and clean everything."

The shop motto reflects that approach: small-town feel with big-town quality. The Schneblys invest in high-quality equipment, from alignment machines to tire and balance equipment, to ensure customers receive dependable service.

"I'll be honest, we're not the cheapest guy in town, nor do we strive to be," Andrew said. "But for what you're paying, you're getting a lot of value."

## Investing in community

As a family with four young boys, the Schneblys are committed to giving back. They support Blue Santa, the Monroe County Fairgrounds and 4-H and have contributed to local school projects. Their children are active in 4-H and attend school in Albia.

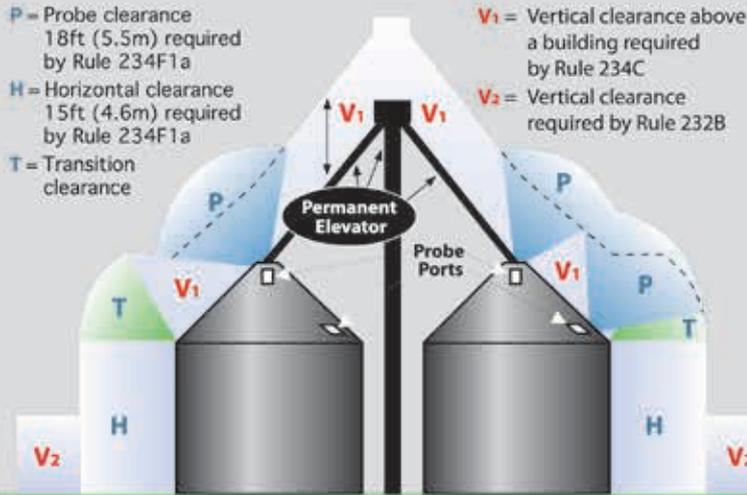

"We've felt very welcomed in the community," Ally said.

Much of the shop's growth has come through word of mouth, with minimal advertising. The couple also makes a point to support other local businesses whenever possible.

For area residents looking for trusted vehicle care, Double A Tire & Repair reflects what small-town businesses do best: neighbors serving neighbors, with pride in their work and a long-term commitment to the community.

## MAINTAIN PROPER CLEARANCE AROUND GRAIN BINS

The state of Iowa requires specific clearances for electric lines around grain bins, with different standards for those filled by portable and permanent augers, conveyors and elevators. According to the Iowa Electric Safety Code found in Iowa Administrative Code Chapter 199 – 25.2(3) b: *An electric utility may refuse to provide electric service to any grain bin built near an existing electric line which does not provide the clearances required by the American National Standards Institute (ANSI) C2-2023 "National Electrical Safety Code," Rule 234F. This paragraph "b" shall apply only to grain bins loaded by portable augers, conveyors or elevators and built after Sept. 9, 1992, or to grain bins loaded by permanently installed augers, conveyors, or elevator systems installed after Dec. 24, 1997.* The Iowa Utilities Commission has adopted this language.

Your local electric cooperative is required by the Iowa Utilities Commission to provide this annual notice to farmers, farm lenders, grain bin merchants and city and county zoning officials. The drawings on this page show the required clearances, but your co-op's policies may be more restrictive. If you have any questions concerning these regulations – or what needs to be done before you begin placing a new grain bin or moving an existing one – please call your electric co-op for help.

These drawings are provided as part of the Iowa electric cooperatives' annual public information campaign and are based on the 2023 Edition of the National Electrical Safety Code. To view the actual drawings, refer to that publication.

Every care has been taken for the correctness of the contents of these drawings. However, the Iowa Association of Electric Cooperatives and its member cooperatives accept no liability whatsoever for omissions or errors, technical inaccuracies, typographical mistakes or damages of any kind arising from the use of the contents of these drawings, whether textual or graphical.

# LUCKIER THAN A FOUR-LEAF CLOVER

BY DARCY DOUGHERTY MAULSBY

March is a time to celebrate all things Irish, including proverbs like “a good friend is like a four-leaf clover; hard to find and lucky to have.”

I’ve been thinking about the clubs that have thrived in Iowa’s small towns and rural neighborhoods, like the Friendly Club my grandma and mom belonged to. While many of those clubs are memories now, I was lucky to be a guest at Carol Hardy’s home in Lohrville for the January meeting of the Adaza Thursday Club.

My friend Lou Blanchfield tipped me off that the club is 100 years old. I asked how one becomes a member. “Your mother-in-law invites you!” joked Lou, noting that her mother-in-law Margaret’s grandmother was a charter member.

True to the club’s name, members still gather on the first Thursday of the month in each other’s homes. Their club has even outlived Adaza itself.

## Keeping Adaza alive in spirit

Adaza’s story began in 1881. Around this time, the railroad put in a stub track southeast of the new Calhoun County town of Lohrville, at a little spot called Cottonwood. When a landowner named Captain Albert Head stepped off the train in 1882, he looked at Cottonwood and said, “Ain’t it a daisy?”

That offhand comment transformed Cottonwood into Adaza, which grew to include general stores, a grain elevator, creamery, hotel, blacksmith, bank, lumberyard, post office, school and two churches.

Adaza started fading by the 1920s. The Methodist Episcopal Church disbanded in 1924. Undeterred, a group of ladies met at Ruth Baldrige’s home on Aug. 6, 1925, and created the Adaza Thursday Club. They elected club officers, set dues at 25 cents a year, and established roll calls and programs for upcoming meetings.

A recent meeting of the Adaza Thursday Club at Carol Hardy’s home in Lohrville.

Through the decades, club members also hosted picnics, wedding showers and baby showers with skits and plenty of homemade food. New members were advised to wash their windows and bleach their porch steps before hosting club. For many years, Irene Rossmanith, followed by Pat Schmitt, dutifully recorded the club’s activities, submitting this Adaza news to local newspapers.

The club endured, even as Adaza dwindled to a ghost town. By 1981, dues were \$2 a year – “still a bargain for nine or 10 get-togethers with friends and neighbors,” noted “The History and Memories of Adaza: 1881-1981.”

## Still gathering, still connected

While many of those friends and neighbors are gone, the ties that bind are strong. Jane (Hardy) Beschorner, Marty (Guess) Hennesy and her sister Ann (Guess) Gemberling, are second-generation club members. Most members today reside in a 10-mile radius of Adaza.

Dues (\$5 a year) are donated to food pantries, the high school after-prom party or flowers for club members who are ill. While members still enjoy refreshments at meetings, gone are the ornate glass snack-set trays that every good hostess used back in the day.

Sometimes this fun bunch schedules field trips to area orchards, wineries

or the local care center, where they visit club member Barb Winkelman, who’s almost 99.

Other times the ladies get crafty. A few years ago, they had a jewelry-making workshop to transform Swarovski crystals into earrings and necklaces. The crystals were extras from the chandeliers at the renovated Community Memorial Building in Lake City. Club members donated the jewelry to support fundraisers for this historic gem.

Newer members like Marilyn Parker appreciate how the club helps them get to know more people. All the members treasure their deep friendships – gifts that are hard to find and lucky to have. “It’s fun, and we like each other,” said Jane Beschorner. “Why wouldn’t we keep getting together?”
